PRIME OIL SELECT™

ADJUVANT

GENERAL INFORMATION

Prime Oil SELECT is a crop oil concentrate that contains a balanced system of oil and surfactants designed to carry herbicide and defoliant actives through waxy plant surfaces to the interior of the pests where they can provide more effective control. Prime Oil SELECT may be used as a replacement for crop oils and other surfactants added to herbicide spray programs used to control post-emergent weeds.

DIRECTIONS FOR USE

Review and understand pesticide label requirements, ensuring crop oil or other oil based additives are not prohibited. Fill spray tank halfway with water. Initiate agitation and add herbicides and other tank mix partners in accordance with the recommendations of the pesticide's label. Continue filling tank with water. Add appropriate amount of Prime Oil SELECT last while continuing agitation.

USE RATES

At 5-50 gallons per acre, use 1 to 2 pints Prime Oil SELECT per acre in sufficient volume to provide good plant coverage with the spray equipment being used. In cases where waxy cuticles are particularly well developed, add as much as 1 to 2 quarts per acre. DO NOT exceed 2.5% v/v concentration. If the applicator does not have experience using this product, care should be exercised in applying Prime Oil SELECT with herbicides to a variety of plants under a variety of weather conditions. Testing the spray solution in a small areas is recommended. Due to variation in natural water compositions, formulations by brand, and types of agitation, pre-testing of the intended tank mixture is recommended.

STORAGE AND DISPOSAL

Storage: Store in a cool, dry place. Store in original container only. Do not add anything to the container. Keep container tightly sealed when not in use and do not allow water to be introduced. Do not store near fire, flame or other potential sources of ignition. Do not contaminate water, food or feed by storage or disposal of this product. Do not store near strong oxidizers. Shake well before using. If product freezes, allow to thaw, then shake well. For optimal storage, store between 40° and 90° F. If Prime Oil SELECT is stored below 20° for an extended period, it may become cloudy and thicken. By raising the temperature above 32° of the product will return to its normal clear and fluid state.

Disposal: Do not reuse empty container. Triple rinse (or equivalent) during mixing and loading. Recycling decontaminated containers is the best option of container disposal if allowed by law. The Agricultural Container Recycling Council (ACRC) operates the national recycling program. To contact your state and local ACRC recycler visit the ACRC web page at www.acrcycle.org. Decontaminated containers and materials must be disposed of in a manner allowed by local, state and federal laws and regulations.

WARRANTY STATEMENT

Seller warrants that this product conforms to its chemical description and is reasonably fit for the purpose stated on the label, when used in accordance with directions under normal conditions of use, but neither this warranty nor any other warranty of merchantability or fitness for a particular purpose, expressed or implied, extends to the use of this product contrary to label instructions, or under abnormal conditions, or under conditions not reasonably foreseeable to the seller, and buyer assumes the risk of any such use.
