TURF WET SELECT™

ADJUVANT

PRINCIPAL FUNCTIONING AGENTS

Proprietary blend of nonionic wetting agents.....	100.0%
Total	100.0%

SOIL WETTING AGENT

KEEP OUT OF REACH OF CHILDREN CAUTION

Avoid contact with skin, eyes or clothing. Do not take internally. Wear chemical-resistant eyewear and gloves, long-sleeve shirt and pants and shoes and socks. Do not eat, drink, smoke or chew gum while using this product. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, or using tobacco. In addition, follow precautionary statements on all products used with this material. Clean affected clothing, shoes, and protective equipment before reuse.

FIRST AID

IF SWALLOWED:	<ul style="list-style-type: none"> • Have person sip a glass of water if able to swallow. • Do not induce vomiting unless told to do so by a poison control center or doctor. • Do not give anything by mouth to an unconscious person.
IF ON SKIN OR CLOTHING:	<ul style="list-style-type: none"> • Take off contaminated clothing. • Rinse skin immediately with plenty of water for 15-20 minutes.
IF INHALED:	<ul style="list-style-type: none"> • Move person to fresh air. • If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth to mouth if possible.
IF IN EYES:	<ul style="list-style-type: none"> • Hold eye open and rinse slowly and gently with water for 15-20 minutes. • Remove contact lenses if present, after the first 5 minutes, then continue rinsing eye.
Call a poison control center or doctor immediately for treatment advice. Have the product container with you when calling a poison control center or doctor, or going for treatment.

TURF WET SELECT™

ADJUVANT

GENERAL INFORMATION

Turf Wet Select™ increases infiltration and evenly distributes water into the roots zone in hydrophobic soils. Hydrophobicity caused by such diseases as localized dry spot and fairy ring, decrease vigor by not allowing water and nutrients to reach the roots of the plants. Turf Wet Select surrounds the water repellent soil particles with water-friendly wetting agents, allowing the water to pass to the vital roots. Thus, Turf Wet Select increases greening and reduces or eliminates brown spots. Using a well-proven, plant-friendly technology, Turf Wet Select may be used on any water repellent soil including on highly managed turf.

DIRECTIONS FOR USE

Turf Wet Select may be used with other spray partners such as fungicides, insecticides, fertilizers, etc., so long as the user or applicator has performed a jar test of all ingredients in the right ratios to prove that the components are compatible with one another. Mix Turf Wet Select, water and any components according to the use rates below. Application may be made using any type of irrigation system. Turf Wet Select may be applied directly to turf or to soils underneath other types of plants. Use good practices such as spraying during cooler periods or at night in order to minimize plant stress. Turf Wet Select may also be applied to bare ground

APPLICATION RATES

Treatments of Turf Wet Select may be applied in small and frequent or large and infrequent doses. While frequent small applications are more reliable, this flexibility in treating hydrophobic soils can be implemented with current irrigation or spray regimens that will yield similar long term results.

Applied every 2 weeks: First application is at 4 ounces with 2 gallons of water per 1000 ft². Every other week, subsequent applications will be made at 2 ounces with 2 gallons of water per 1000 ft².

Applied monthly: First application is at 4 ounces with 2 gallons of water per 1000 ft². Subsequent applications should be made once a month at 2 – 6 ounces with 2 gallons of water per 1000 ft².

Applied bi-annually: A single application of 8-16 ounces with 2 gallons of water per 1000 ft² will be sufficient to treat hydrophobic soils for 6 months. For better results, apply 8 ounces with 2 gallons of water per 1000 ft² initially and repeat again 2 weeks later. Applications at this rate should not be applied with other chemicals and fertilizers.

As the soil is watered, the wetting agent will slowly wash off of the hydrophobic particles. At some point, the amount of hydrophobic surface exposed will make the soil water-repellent again. Applications should be increased to the high end of use rate ranges or the frequency should be intensified before this happens to keep water flowing to the root zone. Though watering-in Turf Wet Select is not necessary, it is highly recommended in order to properly reach the depth necessary to surround the hydrophobic particles that are below the surface of the soil.

STORAGE AND DISPOSAL

Storage: Store in a cool, dry place. Store in original container only. Do not add anything to the container. Keep container tightly sealed when not in use. Do not store near fire, flame or other potential sources of ignition. Do not contaminate water, food or feed by storage or disposal of this product.

Disposal: Do not reuse empty container. Triple rinse (or equivalent) during mixing and loading. Recycling decontaminated containers is the best option of container disposal if allowed by law. Decontaminated containers and materials must be disposed of in a manner allowed by local, state and federal laws and regulations.

WARRANTY STATEMENT

Seller warrants that this product conforms to its chemical description and is reasonably fit for the purpose stated on the label, when used in accordance with directions under normal conditions of use, but neither this warranty nor any other warranty of merchantability or fitness for a particular purpose, expressed or implied, extends to the use of this product contrary to label instructions, or under abnormal conditions, or under conditions not reasonably foreseeable to the seller, and buyer assumes the risk of any such use.
