X-Out™ is a post emergent, non-selective, herbicide that mixes readily with water to be applied as a spray for the control of broadleaf weeds and grasses. A group 10 herbicide (glutamine synthetase inhibitor), X-Out is a foliar-active material with little or no soil-residual activity. Visual results showing necrosis of leaves and young shoots occur within 2 to 4 days after application under good growing conditions.

X-Out is rainfast four (4) hours after application to most weed species; therefore, rainfall within four (4) hours may necessitate retreatment or may result in reduced weed control.

- More than 2X the strength of Finale® herbicide
- Provides control of a wide variety of emerged annual and perennial broadleaf weeds and grasses
- Excellent tank mix partner with pre-emergent herbicides such as prodiamine, oryzalin and oxadiazon
- Effective pre-plant treatment for turf, ornamentals, and greenhouses due to minimal soil residual
- Reduced translocation enables ability to create and maintain clear boundaries around golf turf, sand traps, and athletic fields and accurate application areas around existing ornamentals in landscape beds
- Excellent rotation herbicide for managing existing or developing resistance issues

### Labeled Uses

Golf courses - along cart paths, around sign and light posts, and around sand traps

Landscape areas - around individual trees and shrubs, landscape beds, foundations, fences, driveways, paths, and parking areas

Roadsides, fence rows

Utility rights-of-way

Railways

Industrial areas

Educational facilities, schools

**IMPORTANT:** Always read and follow label instructions.
For the following weeds controlled by X-Out apply:

**Spot application:**
Apply 0.75 fl oz/gal of water (0.014 lb ai/gal of water) when the weed height or diameter is less than 6 inches.
Apply 1.25 fl oz/gal of water (0.023 lb ai/gal of water) when the weed height or diameter is 6 inches or greater.

**Broadcast application:**
Apply 40 fl oz/A (0.73 lb ai/A) when the weed height or diameter is less than 6 inches.
Apply 56 fl oz/A (1.02 lbs ai/A) when the weed height or diameter is 6 inches or greater.

**Broadleaf weeds**
- Chickweed
- Clover
- Common Cocklebur

**Grasses and Sedges**
- Barnyardgrass
- Cupgrass
- Fall Panicum
- Giant Foxtail

For the following weeds controlled by X-Out apply:

**Spot application:**
Apply 1.25 fl oz/gal of water (0.023 lb ai/gal of water) when the weed height or diameter is less than 6 inches.
Apply 1.75 fl oz/gal of water (0.032 lb ai/gal of water) when the weed height or diameter is 6 inches or greater.

**Broadcast application:**
Apply 56 fl oz/A (1.02 lbs ai/A) when the weed height or diameter is 6 inches or greater.

**Broadleaf weeds**
- Annual sowthistle
- Bindweed
- Buffalobur
- Burdock
- Canada thistle
- Curly dock
- Dandelion
- Dogbane (hemp)
- Field growwell

**Grasses and Sedges**
- Annual bluegrass
- Bahiagrass
- Barley
- Bermudagrass
- Carpetgrass
- Crabgrass

**IMPORTANT:** Always read and follow label instructions.
