In and around homes, commercial and industrial buildings
Recreational areas
Athletic fields
Lawns
Landscape ornamentals

Bifenthrin 7.9F Select™ is an odorless, non-irritating to skin, non-phytotoxic residual insecticide that will give you superior, long lasting control. The active ingredient, bifenthrin, not only has a wide range of pests controlled but is approved in key indoor and outdoor areas such as residential, industrial, commercial and food-handling areas. For prevention and control of termites, carpenter ants and other pests of structures.

PRODUCT BENEFITS

- Controls a wide range of insects and mites on trees, shrubs, flowering plants, non-bearing fruit and nut trees, and flowers
- Controls pests indoors and outdoors on residential, institutional, public, commercial, and industrial buildings, and lawns, parks, recreational areas, and athletic fields
- For use in interiorscapes including hotels, shopping malls, and office buildings
- For use in outdoor plantscapes including residential dwellings, parks, institutional buildings, recreational areas, athletic fields, and home lawns
- Prevents and controls ticks (including ticks that may transmit Lyme disease and Rocky Mountain spotted fever)

BIFEN 7.9F SELECT™

Broad spectrum insecticide/termiteicide

APPLICATION INFORMATION

Horticultural applications

Bifenthrin 7.9F Select™ is effective for use on a broad range of insects and mites on trees, shrubs, leafy plants, nonbearing fruit and nut trees. It may also be used on interior plants found in hotels, shopping malls, office buildings and other similar areas. **Bifenthrin 7.9F Select™** may be used by itself or in a tank mix with other products such as insect growth regulators.

Turf applications

Bifenthrin 7.9F Select™ can be used as a broadcast treatment on turfgrass for control of many insects including armyworms, cutworms, chinch bugs, ants and ticks. **Bifenthrin 7.9F Select™** may be applied at up to 1 fl. oz. per 1,000 square feet at the discretion of the applicator. Maximum residual control requires the higher treatment rates.

Pest control on outside surfaces and around buildings

Bifenthrin 7.9F Select™ may be used to control ants including carpenter ants and fire ants, armyworms, bees, beetles, biting flies, boxelder bugs, centipedes, chiggers, chinch bugs, clover mites, crickets, cutworms, dichondra flea beetles, earwigs, elm leaf beetles, firebrats, fleas, flies, gnats, grasshoppers, hornets, japanese beetles, midges, millipedes, mosquitoes, moths, roaches (including cockroaches), scorpions, silverfish, sod webworms, sowbugs (pillbugs), spider mites, spiders (including black widow spiders), springtails, ticks (including brown dog ticks), and wasps.

Food handling establishments

If used as a general spot, surface, or crack and crevice treatment, **Bifenthrin 7.9F Select™** may be applied in both food/feed and non-food areas of food/feed-handling establishments. Food/feed-handling establishments are any place other than private residences where exposed food/feed is held, processed, prepared or served, including areas for receiving, storing, packing (bottling, boxing, canning, wrapping), preparing, enclosed processing systems (dairies, edible oils, mills, syrups) of food and edible waste storage. Serving areas where food is exposed and the facility is in operation are also considered food areas. Nonfood areas in which applications are allowed include entries and vestibules, floor drains (to sewers), garages, garbage rooms, lavatories, locker rooms, machine rooms, mop closets, offices, and storage (after canning or bottling).

Livestock and poultry buildings and kennels

Bifenthrin 7.9F Select™ may be used as a surface spray (including directed spray) and crack and crevice application for control of flies, fleas, beetles, bed bugs, mites and ticks. Usual cleaning of the structure must be completed along with the **Bifenthrin 7.9F Select™** application for effective control.

Insects controlled

Chinch bugs	Fire ants	Mosquitoes	All species of lawn ants
Annual bluegrass weevils	Mole crickets	Scorpions	
Bill bugs	Fleas	Termites	
Carpenter ants	Mites	Ticks
