

BIFEN G/N 7.9F SELECT™

Golf course and nursery termiticide/insecticide

ACTIVE INGREDIENT

Bifenthrin – Group 3A

% ACTIVE INGREDIENT

Bifenthrin 7.9%

FORMULATION

Flowable

CHEMICAL FAMILY

Group 3 A

Type 1 pyrethroid

BRAND ALTERNATIVE

FMC Talstar® Select

MODE OF ACTION

Effective by contact or ingestion. Affects the central and peripheral nervous system by interfering with sodium channel gates.

RESTRICTED USE

Yes

SIGNAL WORD

Caution

PACKAGING

4 x 1 gal

LABELED USES

Commercial non-food use on indoor and outdoor ornamentals

Nurseries

Golf course turf

Sod farms

Greenhouses

IMPORTANT: ALWAYS READ AND FOLLOW LABEL INSTRUCTIONS.

Intended for use and storage by commercial applicators for non-food use on indoor and outdoor ornamentals, nurseries, turf on golf courses and sod farms.

Bifenthrin G/N 7.9F Select™ is an odorless, non-irritating to skin, non-phytotoxic residual insecticide that will give you superior, long lasting control. The active ingredient, bifenthrin, not only has a wide range of pests controlled but is approved for use on golf courses, sod farms, greenhouses, and nurseries.

PRODUCT BENEFITS

- Controls numerous insects and mites on trees, shrubs, foliage plants, non-bearing fruit and nut trees, and flowers in greenhouses
- Can be incorporated into potting media for the control of imported fire ants
- Use as a preventative treatment for larval control for such pests as white grubs, black vine weevil, Japanese beetle

BIFEN G/N 7.9F SELECT

Golf course and nursery termiticide/insecticide

APPLICATION INFORMATION

Ornamentals in greenhouses, lath houses, shade houses and outdoor nurseries, including non-bearing fruit and nut trees.

Apply 0.025 to 0.2 lbs ai/A (5 to 40 fl. ozs.) of **Bifenthrin G/N 7.9F Select™**. Provided the maximum label rate (0.2 lbs. ai/A or 40 fl. ozs.) is not exceeded, **Bifenthrin G/N 7.9F Select™** can be diluted and applied in various volumes of water. It may also be applied through low volume application equipment by dilution with water or other carriers. Refer to dilution chart on label for specific instructions.

Imported fire ant (IFA) quarantine treatment

For Imported Fire Ants (IFA) in potting media (including balled and containerized nursery grown ornamental trees, shrubs, plants, flowers, conifers, bushes, Christmas trees, and non-bearing fruit and nut-trees). **Bifenthrin G/N 7.9F Select™** is approved and can be used in accordance with the USDA Imported Fire Ant Quarantine Program. **Bifenthrin G/N 7.9F Select™** may be applied either as a high volume drench treatment, soil incorporated, or as a topical application.

Turf (Golf courses and sod farms)

During periods of high pest pressure or for maximum residual control, **Bifenthrin G/N 7.9F Select™** can be applied at up to 0.1 lb. ai/A (20 fl. ozs.), (0.2 lb ai/A or 40 fl. oz. for ants, imported fire ants and mole crickets). **Bifenthrin G/N 7.9F Select™** may be applied as a surface or sub-surface treatment. To get uniform coverage when treating dense and/or long turf foliage use application volumes of up to 10 gallons per 1000 sq. feet. For low volume applications (less than 2 gallons/1000 square feet): The treated are should be irrigated with at least 0.25 inches of water immediately following treatment to ensure control of sub-surface pests such as, but not limited to, mole crickets.

Insects controlled

Chinch bugs	Carpenter ants	Mites	Ticks
Annual bluegrass weevils	Fire ants	Mosquitoes	All species of lawn ants
Bill bugs	Mole crickets	Scorpions	
	Fleas	Termites
