

TURF WET LT SELECT™

A long-term 120-day soil surfactant

**PRINCIPAL
FUNCTIONING AGENTS**

120-day soil surfactant
comprised of 100%
alkoxylated polyols

% ACTIVE INGREDIENT
100%

FORMULATION
Concentrate

MODE OF ACTION
Soil wetting agent

RESTRICTED USE
No

EPA REGISTRATION
N/A; All ingredients are
exempt from tolerance
under 40 CFR 180

SIGNAL WORD
Caution

PACKAGING
2 x 2.5 gal

FOR USE WITH
Herbicides
Insecticides
Fertilizers

LABELED USES
Tees
Greens
Fairways
Lawns
Sports turf
Parks

**IMPORTANT: ALWAYS
READ AND FOLLOW
LABEL INSTRUCTIONS.**

Combining two complimentary block surfactants together with a graft polymer surfactant, **Turf Wet LT Select™** represents the latest technology in soil surfactants by providing up to 120 days of performance.

This new soil surfactant technology provides for increased hydration characteristics while compensating for microbial degradation of the polymer. The combination results in uniform hydration and increased water movement through the root zone. Normal longer term surfactants attempt to obtain 60 - 90 days of performance simply by applying higher concentrations as a measure to offset microbial degradation, which is the leading cause of surfactant failure.

The grafted polymer technology found in **Turf Wet LT Select™** is radically different from any other long-term surfactant on the market and truly represents the leading edge of longevity and high performance surfactant technology for demanding turf environments.

PRODUCT BENEFITS

- Extremely uniform hydration characteristics
- Reattaches to soil particles, unlike traditional surfactants
- True 90-day plus surfactant – up to 120 days of performance
- Increased vertical and lateral water movement
- Reduces LDS (localized dry spot)
- Safe, non burning formulation
- Combination of 3 polymers for unsurpassed performance
